

Plastic coils are used for easy and quick bundling of cables and conductors.

Product description

Application range

- For the manufacturing of cable harnesses with branch-offs
- For protection against mechanical stress

Benefits

- Flexibility of the cables is largely preserved
- Spiral-shaped cut tube
- For time-saving cable and wire bundling

Technical Data

General
Material

Black version: UV-resistant
Black version: polyamide (silikone free and halogene free)

KW plastic coil

Temperature range

Nature and yellow version: polyethylene

Black version: -40°C to +120°C

Natural version -50°C to 85°C
