

Mille-Tie™ cable ties are easy to be reopened and hence particular protecting sensitive cables as glass fibres.

- Environmentally friendly

Product description

Application range

- For high-quality and complex cable management systems
- For bundling of sensitive cables as fiber optic cables and network cables

Benefits

- Could be reused again
- Adjusts and controls the tension automatically by means of a self-regulating mechanism
- Fast assembly as binder can be mounted in any direction
- No sharp edges, avoids injuries
- No cable damage and crushing due to the elasticity of the tie

Design

- One size for all applications

Technical Data

Material

TPE

Temperature range

-20°C to +80°C
