

Earthing clamps for secure contact with metallic conduits, fast and easy assembly, for electrical installations in buildings

Product description

Application range

- Electrical installations in buildings
- For secure contact with metallic conduits
- Secure equipotential bonding
- Easy connection of multiple adjacent conduits to the potential equalisation point without interrupting the potential equalisation conductor
- Potential equalisation is not interrupted when removing a conduit

Benefits

- Typ K: Only one open side- no interrupted earthing cable
- Typ G: can be mounted both horizontally and vertically
- Fast and easy assembly
- Large contact surface thanks to two contact screws

Product Make-up

- Prooved up to a cross section of the earthing cable of 50 mm²

Norm references / Approvals

- Complies with DIN EN 60947-2-2:2009 and SEV 1078:1980

Technical Data

Material	Brass tin-plated
Temperature range	-40°C to +200°C
