

EKK single clamp for fastening cables and conductors.

Product description

Application range

- Simple and reliable mounting clamps for lift control cables

Benefits

- Secure protection without restricting the mobility of the cable cores
- Wide clamping range

Note

- Installation guidelines for ÖLFLEX® -LIFT RH and RS lift control cables can be found in the appendix T5
- Maximum load for each clamp: 800 N (80 kg)
- Only for vertical assembly

Included

- Impact anchor, screws and safety discs are supplied as installation accessories

Technical Data

EKK single clamp

Temperature range

high mechanical load: +65°C
low mechanical load: +100°C
