

FKK 08 wedges for fastening flat cables up to 10 mm cable thickness

Product description

Application range

- Flat cable wedge clamps are suitable for securing flat control cables.

Benefits

- On the shaft side, the mounting plate can be screwed onto the wall or bolted or welded to the rail bracket.
- The mounting plate can be bolted or welded to the lift cage.

Product Make-up

- Maximum cable thickness: 10 mm
- The small wedge-shaped cable clamp can hold up to two flat cables.

Technical Data

Info

Clamping force: at overall cable thickness 2-10 mm = 600-800 N

Material

Minimum insert depth for wedge: 60 % = 60 mm

Temperature range

Polyamide 6.6 - halogen-free

Operating temperature: -20°C to +50°C
