

MULTICRIMP 6 Crimping tool/pliers for pressing insulated conductor end sleeves with a hexagonal print, made in Germany

Product description

Application range

- Cross-section range from 0.08 - 6.0 mm² with hexagonal pressing

Benefits

- Uniform feed on the crimp die guarantees exact crimping profiles
- Easy to handle due to the automatic adjustment for the different crimping cross-sections
- Forced locking for reliable, DIN-compliant crimping connections, unlockable
