

Stripping and dismantling tool for cables/conductors, adjustable cutting depth, especially for data cables and scoring the armouring of fibre optical cables

Product description

Application range

- Special stripping tool for data cables
- Adjustable stripping tool for round cables made with various insulation materials
- For fast, simple stripping of different insulation materials (especially PUR) with outer diameters up to 10 mm
- Suitable for scoring the armouring of fiber optic cables

Benefits

- Adjustable cutting depth via screw-setting, which enables the stripping of multi-stage insulated cables with different sheath thicknesses
- Self-tightening handle guides the knife cleanly on the cable

Note

- Pull back the knife before removing the cable from the cutting tool
