

HOTY heat-shrink tube- tubing made of PVC with good price performance for protecting and insulating cables, flame retardant, black design is UV-resistant, shrinking ratio: 2:1.

Product description

Application range

- HOTY heat-shrink tubing is used for protecting and insulating contacts, cable lugs, connectors etc.

Benefits

- Well-priced
- Good weather and UV-resistance
- Flame-retardant
- Safe transport is secured via light pressure

Norm references / Approvals

- Flame-retardant according to UL94 VO

Note

- Storage temperature: max. +18°C
