

PLG-HSB box shrink tube- the shrinking tubing in an handy box is especially interesting for small consumers. With a shrinking ratio is 2:1 the tubing guarantees an effective electrical insulation.

Product description

Application range

- General purpose, flexible heat shrink tubing for protection, insulation and bundling

Benefits

- Very flexible, UL 224 flame retardant thin-walled heat shrink tubing with excellent physical and mechanical properties
- Convenient quantity for small consumers
- Stackable boxes for easy storage

Product features

- UV-resistant

Technical Data

Note	Thin walled
Info	Shrinking ratio: 2:1
Colour delivered	Black- UV-resistant
	Transparent - halogen-free
Material	Cross-linked polyolefin, without silicone, cadmium and lead
Temperature range	-55°C to +135°C
	Shrinking temperature: +90°C
