

TEC sealing caps with adhesive coating inside can be used for insulating and sealing of cable splices.

Product description

Application range

- For sealing cable ends against the seepage of moisture and contaminants

Benefits

- Secure sealing through thermoplastic adhesive coating on the inside
- Good resistance to chemicals and solvents
- Ensures high tensile strength and mechanical protection

Technical Data

General

Colour delivered

Material

UV-resistant

Double-walled

Black

Cross-linked modified polyolefin, with thermoplastic

TEC sealing cap

Temperature range

adhesive coating inside
Halogen-free and silicone-free
-55°C to +100 °C
Shrink temperature: 135°C
