

Insulating tube ISS made of silicone for bundling and insulating cables against heat, cold and temperature fluctuations (temperature resistance: -50 to 180°C)

Product description

Application range

- Insulating tube

Benefits

- Provides good insulation against heat, cold or temperature fluctuations
- Resistant to most chemicals
- Good weather and UV-resistance

Note

- Not suitable for shrinking

Technical Data

Insulating tube ISS

Material	Silicone
Temperature range	UV-resistant -60°C to +200°C
