

TBTA is an universal self-amalgamating electrical tape which protect against UV and ozone.

Product description

Application range

- To repair and maintain cable sleeving up to 30 kV
- Alternative to Insulating tapes and shrink tubings
- Typical application area: antenna mast

Benefits

- Contains a dense insulation layer with fault-free electrical stability
- long term resistance to moisture penetration, which demands waterproofing
- Offers UV and ozone protection
- Easy to apply- no tool or heating required

Product features

- Material becomes self-adhesive after 30 min, no glue necessary

Technical Data

Caution	Insulation and sheathing of cables and connections up to 65 kV
General	Stretch ratio: 3:1
Info	Offers UV and ozone protection
Colour delivered	Black
Material	Based on ethylene propylene rubber
Temperature range	-55°C to +105°C
