

Copper braid for EMC-compliant screening protects the cable from interferences transmitted by other electrical fields, also for the automotive industry (ISO-TS approved).

## Product description

### Application range

- EMC-compliant screening
- Can be used as earthing tape
- Automotive industry

### Design

- Three available sizes: Cover a diameter range from 1 to 20 mm
- Variable diameter by tightening the braid

### Norm references / Approvals

- ISO-TS approved

## Technical Data

General	Minor differences are possible depending on the production batch
Note	Degree of coverage: 85 % at maximum opening
Material	Tinned-copper
Temperature range	-30°C to +105°C Max. temperature: +120°C (short-term)
