

In extended systems, the use of the RG 59 B/U multi-coaxial cable as a screened supply cable prevents an accumulation of individual cables running in parallel over long distances; This saves installation costs and provides greater mechanical protection for the each sensitive cable.

Product description

Benefits

- In extended systems, the use of the RG 59 B/U multi-coaxial cable as a screened supply cable prevents an accumulation of individual cables running in parallel over long distances.
- This saves installation costs and provides greater mechanical protection for the each sensitive cable.

Product Make-up

- 2 x single coaxial cables type RG 59 B/U
- Twin cable
- PVC sheath
- Colour: black

Product features

- Multi-coaxial cables provide an easier installation than individual installation

Technical Data

Multi coaxial cables RG 59 B/U

Based on
Minimum bending radius
Temperature range

Similar to MIL specification MIL-DTL17 H
Fixed installation: 15 x cable diameter
Fixed installation: -40°C to +80°C
