

Suitable accessories for FLEXIMARK® Thermal transfer printer A4+M and EOS 4 as perforation cutters and ribbons in black and white

Product description

Application range

- Resin ribbons R 71: Solely for plastic labels with smooth and shiny surface
- FTI-Y: Excellent printing results on all labels with the exception of the diesel-resistant shrink tube and TA labels
- FTI-X: Particular recommended for diesel resistant shrink tubes

Benefits

- Suitable for each label width and surface. Resistant to scratching and abrasion (also in colour) - available in various qualities
- Use the right ribbon for the particular application
- With the cutter for FLEXIMARK® thermal printer EOS 4 diverse labels and shrink tubes can be cut
- The perforation cutter for the thermal printer FLEXIMARK® A4+M cuts as well as perforates holes

Note

- Other versions are available upon request
