

FLEXIMARK® Flexipart are pre-printed markers for single core marking and marking of glass fibre cables, easy and quick to install

Product description

Application range

- For Single core marking
- Marking of optical fibre cables
- Marking before assembly
- Blank markers: For prototype marking and colour-marking

Benefits

- Easy to install
- Good overall view, as the remaining markers stay on the marking roll
- Resistant to UV radiation, corresponding to 1 year outdoor in the south of Sweden

Product Make-up

- Flexipart will be supplied as roll that contains 200 or 600 markers, depending on the size

- Sequence cards are labeled markers (with numbers) which are delivered on label sheets

Note

- For cable cross-sections over 16.00 mm², cable ties can be used for installing single markers
