

For safe and continuous charging; Power reserve for plug release in case of power failure; Additional 12V outputs for peripherals

- For optimal control of the type 2 socket outlets

Product description

Benefits

- For safe and continuous charging
- Power reserve for plug release in case of power failure
- Additional 12V outputs for peripherals

Product features

- Integrated power supply unit 230V/12V with power supply in case of power failure
- Adjustable charging current of 6A-80A by means of rotary switch
- For each type 2 socket outlet EVCP2 one controller is necessary
- Possibility to control the RGB LED lighting
- Control of charging contactor and connector lock

Technical Data

Nominal voltage	95 ... 265 V AC
Protection rating	IP 30
Temperature range	Operation: -20 °C to +70 °C
