

Weather-resistant flat rubber cables

Weather-resistant for harsh environmental conditions; Flat cables need less space than round cables; Smaller bending radii is possible

- For outdoor cable trolley application
- Space-saving installation
- Also suitable for power chains and lift applications

Product description

Application range

- In crane systems on building sites and shipyards for fixed installation, or for flexible use in cable trolley systems
- Sewage treatment plants, steelworks and high rack facilities
- The application profiles for ÖLFLEX® CRANE and ÖLFLEX(R) LIFT cables can be found in the appendix, selection table A3

Benefits

- Weather-resistant for harsh environmental conditions
- Flat cables need less space than round cables
- Smaller bending radii is possible

ÖLFLEX® CRANE F

Product Make-up

• Strands of bare or tinned-copper wires

• Core insulation: rubber compound

· Outer sheath: special rubber compound

Norm references / Approvals

• Based on VDE 0250 (NGFLGÖU)

Product features

• Flame-retardant according IEC 60332-1-2

Technical Data

Core identification code Up to 5 cores: colour-coded according to VDE 0293-308,

refer to Appendix T9

From 6 cores: black with white numbers

ETIM 5.0 Class-ID: EC000825

ETIM 5.0 Class-Description: Flat cable

Copper conductor according to VDE 0295/IEC 60228

up to 25 mm²: extra-fine wire, class 6 from 35 mm²: fine wire, class 5 Flexible use: 10 x cable thickness

U₀/U: 300/500 V

3000 V

G = with GN-YE protective conductor X = without protective conductor Flexible use: -25°C to +90°C

Conductor stranding

Classification

Minimum bending radius Nominal voltage Test voltage Protective conductor
