

Protects against hot chips; High-tensile; Highly flexible; Air-tight and impermeable; mechanical resistance

- High flexible and mechanical protection at the same time

Product description

Application range

- Mechanical engineering
- Plant engineering
- Automation technology
- Used in areas where cables and wires could be damaged by welding sparks and hot chips
- Robotics industry

Benefits

- Protects against hot chips
- High-tensile
- Highly flexible
- Air-tight and impermeable
- mechanical resistance

Product Make-up

- PVC-insulated steel spring wire
- Soft PVC outer sheath
- Galvanised steel wire braiding

Note

- PU = 10m (on request)

Technical Data

Material	insulated spring steel wire with Soft PVC and galvanized steel braid
Temperature range	-25°C to +80°C Short-term: up to +100°C
